All the Things You Should Know About Breast Cancer Risks But Don't.

Professor Andrew Watterson

Breast cancer clients are highly exposed to non-natural products and environment toxins and possibly chemicals that are known or suspected of interfering with our hormones. In order to make an informed choice about risk reduction, it is important to consider the possibility of non-natural chemicals in the environment.

Dr. Margaret Keith

For background information as to why you need to change the name of the month to Breast Cancer Prevention Month.

What are EDCs, Where are they, Why do you need to know about EDCs?

Chemicals known as Endocrine Disrupting Chemicals (EDCs) are of growing concern to governments, scientists, and activists around the world.

Helen Lynn

There needs to be interventions now, along with better diagnostics and treatment, to improve people's health.

So Why Are So Many Scared? Are We All Just Afraid?

So why is there so much fear and concern about breast cancer? What is the reality behind the statistics? What is the truth behind the myths and the misinformation? How can we ensure that our efforts to prevent and treat breast cancer are truly effective?

Diana Ward

The endocrine system is a collection of glands that produce hormones, including sex hormones, growth hormones, and thyroid hormones. Hormones are chemical messengers that influence the development and maintenance of physiological functions and behavior in animals and plants.

There needs to be interventions now, along with better diagnostics and treatment, to improve people's health.

A Polluting Environment Means Polluting People

Diana Ward

The endocrine system is a collection of glands that produce hormones, including sex hormones, growth hormones, and thyroid hormones. Hormones are chemical messengers that influence the development and maintenance of physiological functions and behavior in animals and plants.

There needs to be interventions now, along with better diagnostics and treatment, to improve people's health.

The Trends Is To Look At The Cancer Prevent Link

Breast Cancer Action Quebec

What has pink become? It's the color of the ribbon for breast cancer awareness, but also the color of the ribbon for all sorts of causes. How did it become the symbol for breast cancer awareness? What does it mean to wear the pink ribbon today? How can we use this symbol to raise awareness and educate people about breast cancer prevention?
